## From The Chairman's Desk

### Dear Parent

It's my pleasure and privilege to be the Chairman of KENNEDY HIGH, not only because it's my passion but also because I enjoy the company of my dearly loved students and talented teachers who keep me energized all the time. The experienced team carefully nurture and develop every student and make this institution a very special place.

The next global generation will need an exceptional academic and intellectual creativity to take on a position of leadership and address the many challenges that we all face. We strive to ensure that the students develop an open and inquisitive mind along with a strong moral compass and a set of values that will help them become strong citizens and leaders of tomorrow.

The curriculum at KENNEDY HIGH is tailored to meet the needs of today's learners and is sensitive to different learning styles. A plethora of academic and co-curricular activities offer the opportunity to all the students to discover various facets of their personalities. The school is prepared to meet the transformation required in the National Education Policy 2020, which outlines the vision of India's new education pattern.

At KENNEDY HIGH, we believe that children need not always be taught how to do things, instead they are to be encouraged to explore, discover and learn by reflection. We strive to augment the physical, intellectual, social, moral, and emotional development of children and foster a positive, empathetic, and compassionate outlook. True education is training of the head, the hand and the heart. Education that builds fundamental traits of character such as honesty, compassion, courage, persistence and responsibility are absolutely essential. A person who is morally educated will be a successful person than a person with excellent academic qualifications. We need to compete for knowledge and wisdom.

With a team of teachers that is passionate and committed to the school's vision and mission, our endeavour is to ignite in each child the curiosity that encourages them to explore and nurture their creativity that leads them towards innovations.

I believe tolerance, accommodation and adaptation are much-needed values in the present times. Both culture and technology need to be integral to education so that our students have the roots and wings to emerge as leaders of tomorrow for India and the world in general. I would request all the parents to inculcate self-discipline in their children and spend some quality time with them, to support them in independent decision making and help them identify their innate skills and talents.

100% results and regular selection of our students in various prestigious colleges speak volumes about the team efforts of the students and staff along with full cooperation of the parents. I take this opportunity to congratulate the Principal, staff and students for their commendable efforts in bringing the school to this level of excellence. I am equally thankful to the parents for their patronage and belief in us.

As we enter a new academic year, I am confident that you will continue to support us in our efforts to make KENNEDY HIGH the global school the best it can be.

Best wishes for the upcoming session.

## From The Principal's Desk

Dear Parent

It gives me great pleasure to welcome you all to the new academic session. We, at KENNEDY HIGH are keen to embark on this journey with open minds and a positive attitude. As always, this year also our goal is to provide a safe, supportive and cooperative place of learning for all of our students, while encouraging our students to continuously strive for their personal best.

A school plays a crucial role in shaping a child's future. At KENNEDY HIGH, we are determined to provide seamless learning targeted towards excellent academic performance through the incorporation of the latest teaching approaches. At the same time, we ensure that we are actively working on the physical, social and emotional development of our children. We provide an atmosphere to our students for multifaceted development, where children are encouraged to channelize their potential in the pursuit of excellence, be kind to one another, support their fellow students, and foster an inclusive and respectful environment.

Our children are taught not only to seize the opportunities that come their way, but also to stay attached to their roots. The students of our school are making their mark in all fields. Our school has now earned a brand name for itself, which is known far and wide for its quality education.

Our teachers are professionally equipped to develop, adapt and modify curriculum content, pedagogy & assessment which suit the needs and aspirations of our students. We work towards a holistic, experiential, integrated, student-centred educational system that helps to improve creativity, critical thinking, and problem-solving skills of our young learners to equip them for the ever-changing employment dynamics and global ecosystems. We educate our children to change the world through peace, empathy, and fraternity and place great emphasis on inner values. Our education has now, moved from knowledge to skills and wisdom, from competition to co-operation, from division to unity and finally from 'how to earn a livelihood' to 'how to live'.

I am sure that the parents of our students play an equally important role in every child's learning experience. I encourage parents to continue to be active participants in the daily learning activities and school experiences of their children. An open, two-way path of communication is vital to the success of our students.

With your unwavering support and partnership, I have no doubt that we will continue to inspire and empower the next generation of leaders and change makers.

Let us make the upcoming academic year one filled with growth, learning, and memorable experiences!
